

Fact Sheet I

Deliverables of a strong HF Programme - 10 key outcomes

1. Provides a systematic way to identify risks - better identification and management of ineffective defences that can reduce incidents and accidents.
2. Develops a learning culture - proactive rather than reactive (iceberg). Continual improvement through a reduction in the number of minor, costly, incidents (bottom of the error iceberg).
3. Reduces rework and cost of rework - currently hidden (bottom of iceberg) plus earlier error capturing.
4. Improves cost / overheads resulting from poor quality. Better business performance and/or efficiencies = competitive advantage
5. Reduces rule breaking and improved working environment resulting in better productivity and morale
6. Builds a positive, reliable and generative organisational culture - fair and just culture generates improved management-operator relationships
7. Reduces the possibility of a (major) accident - improved customer confidence and good public relations and gain safety recognition by customers and travelling public
8. Improves aircraft operational availability improvements
9. Exceeds regulatory requirements with simultaneous bottom line and productivity gains, using continual improvement as the motivator
10. Potentially offers insurance premium reductions and mitigation exposure to (new) corporate manslaughter laws from safety-led professional staff who work inside the box exhibiting their legal duty of care
